

JS PLUGINS & QUIRKS

WEEK 4

JS QUIRKS

- Most inconsistencies between browsers are not in the core language but in the DOM.
- <https://github.com/itpastorn/programming-1-med-js/blob/master/javascript-quirks.markdown>

JS !== DOM

- Unobstrusive JS
 - https://en.wikipedia.org/wiki/Unobtrusive_JavaScript
- Progressive enhancement
 - <http://blog.teamtreehouse.com/progressive-enhancement-past-present-future>
- Capability detect
 - <http://blogs.wrox.com/article/browser-capability-detection-with-javascript/>

LIBRARY VERSIONS

- Dependency

TESTING

- Manual
- Unit Test

MANUAL

- Cross browser testing
- <http://mashable.com/2014/02/26/browser-testing-tools/>

UNIT TEST

- <https://www.smashingmagazine.com/2012/06/introduction-to-javascript-unit-testing/>
- <https://qunitjs.com/>

FINDING PLUGINS

- How important is this plugin to your use case?
- Always test all options
- Check documentation
- Check for dependency and version
- Check last update and maintainer details
- Check issue queue
- Check usage #
